

VINETTE MEVIS SEQUEIRA

Product Manager · B2B SaaS · P2P Messaging & AI Products
Bengaluru, India · vinette.vs@gmail.com · +91 9632300921 · linkedin.com/in/vinette-sequeira/

SUMMARY

Product manager at CallHub, a multi-channel outreach platform (voice, SMS, P2P texting) for political, advocacy, labor, and nonprofit organizations. Owns the Elevate P2P texting product and the AI quality, coaching, and billing features around it. 9 years in B2B SaaS, currently in product after 7 in quality engineering.

EXPERIENCE

CallHub Bengaluru, India

Jan 2025 - Present

Product Manager CPaaS campaign platform for political, advocacy, and nonprofit organizations

- **Owned and shipped Recurring Campaigns**, the engine behind CallHub's SEIU Local 503 case study: the 75,000-member union went from 7-8 years of manual rebuilding to a 15-minute yearly setup across 104 campaigns, saving a service for ~40,000 workers it had nearly cut.
- **Defined and launched Agent Quality & Coaching**, an AI layer that scores call transcripts on script coverage, objection handling, rapport, and goals (0-100), auto-assigns coaching, prices per agent-day, and proves ROI via before/after deltas.
- **Shipped the AI mock-call training** behind it, a two-time internal-hackathon win now in production: managers upload a script once and agents rehearse against AI personas with instant scoring; experienced organizers reported new skills after one session.
- **Wrote the credit-expiry policy** addressing \$1.06M in deferred revenue, converting unrealized liability into recognized revenue while re-engaging inactive accounts.
- **Shipped Salesforce AutoSync**, an opt-in real-time sync of 15-20 contact fields that removed the CSV export-import cycle for the same customer, cutting stale-data risk and re-import tickets.
- **Launched CallHub's first paid AI features** (smart recording, sentiment, summaries) on usage-based billing, and is building the CallHub MCP server to open the platform to AI assistants and agents.

SpotDraft Bengaluru, India

Jun 2022 - Dec 2024

Senior QA Engineer Contract lifecycle management (CLM) SaaS for legal and business teams

- **Led quality strategy** for the core CLM product across API, UI, and integration layers, reducing production defect leakage over 2-week sprint cycles.
- **Partnered with product and engineering** to define acceptance criteria and failure states in PRD reviews, acting as the quality gate that reduced post-launch rework.
- **Built automated regression suites** (Selenium, Python) that cut manual regression effort by ~30% and freed time for exploratory testing.

Kaleyra Bengaluru, India

Nov 2019 - Jun 2022

Software Quality Engineer (Professional to Specialist) Enterprise CPaaS (voice, SMS, WhatsApp) for global telecom and fintech

- **Led a 4-person voice QA team**, owning sprint planning, deliverables, and cross-team coordination for voice-channel features at scale.
- **Ran load and stress testing** (JMeter) on APIs to benchmark performance, feeding the metrics into infrastructure capacity decisions.

Wieland IT Solutions Bengaluru, India

May 2019 - Oct 2019

Software Engineer (QA) Healthcare mobile application

- **Automated iOS and Android testing** (Appium, Xcode, Android Studio) for a healthcare app, working with product and engineering to meet PRD requirements.

Teknotrait Solutions Bengaluru, India

Jul 2017 - May 2019

Associate Software Engineer (QA) Safety, local-guide, and e-learning products

- **Ran functional and cross-device compatibility testing** for a safety-and-compliance app, an ML-based local-guide app, and an e-learning platform.

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Communication

2011 - 2015

St Joseph Engineering College, Mangaluru

AWARDS & CERTIFICATION

- **Two-time winner**, internal CallHub hackathons (AI agent training concept, later shipped to production).
- **Certified Incident Responder**.

SKILLS

Product: Product strategy, roadmap, discovery, PRDs, prioritization, user interviews, A/B testing, go-to-market, monetization and pricing, competitive analysis, OKRs and KPIs, instrumentation

AI & agentic product: LLM-powered features (OpenAI, Gemini), AI agent design and evaluation, AI call-quality scoring, conversation AI, prompt engineering, agentic workflows, MCP, AI-assisted PRD writing

Analytics & tools: Mixpanel, Amplitude, Metabase, SQL, Jira, Figma, Miro, Salesforce
